

CHT-BeauSil™ QUAT 212 EM

Microemulsion of a modified siloxane as an ingredient for personal care.

Description

Cationic modified silicone polymer for the use as an ingredient in Personal Care. The cationic polymer has a high affinity to the hair and can work as well as a booster for other ingredients like PQ-10, Amodimethicone and other polymers.

Key Features

- Conditioning agent for shampoos and treatment
- Ideal for daily use or mild formulation
- For normal and greasy hair
- Supports volume

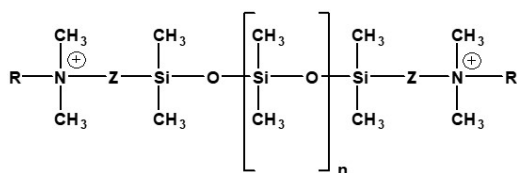

Key Applications

- Shampoo
- Leave-On Products water based
- Shower Gels
- Treatments

Application

CHT-BeauSil™ QUAT 212 EM is an ideal conditioning agent for transparent formulation e.g. Shampoos. The strong cationic character of the Silicouquat polymer makes it ideal for light formulations and greasy hair. Beside Shampoo it can be used also in conditioner, leave-on products and treatments.
