

ICM EM 1630 37% milk white emulsion of an alkyl modified aminosiloxane

Description

This product is a microemulsion of a unique alkyl modified aminofunctional silicone. The specialized alkyl modified aminosilicone is designed to quickly and effectively, hydrophobe and protect a variety of automotive surfaces.

Key Features

- Adds and extremely hydrophobic and protective clear coat to car surfaces
- Better color depth and gloss
- Improves the feel of the surface
- Compatible organic waxes

Application

ICM EM 1630 can be added to many home and car care formulations for improved water repellency, improvement of gloss, color depth, and pleasant surface feel. ICM EM 1630 can be added as raw material in formulations for plastic, leather care, and furniture care.

Health & Safety

Read product and safety data sheets before handling this product for physical and health hazard information. The safety data sheet is available from your CHT representative.

Limitations

This product is not intended for pharmaceutical use.
