

ICM EM 1632

30% surfactant-free solution of a unique alkyl modified amino-functional siloxane

Description

This product is a microemulsion of a unique alkyl modified aminofunctional silicone. The specialized alkyl modified aminosilicone is designed to quickly and effectively, hydrophobe and protect a variety of automotive surfaces.

Key Features

- Adds an extremely hydrophobic and protective clear coat to car surfaces for rapid beading and sheeting.
- Better color depth and gloss
- Improves surface feel
- Compatible with organic waxes

Key Applications

- Automotive Care
- Leather
- Fabric Care
- Glass treatments

Application

ICM EM 1632 has been specially formulated for to be surfactant free leaving only the active ingredients after drying. The unique alkyl modified amino-functional siloxane and additives provide a durable crosslinked structure that hydrophobes a variety of materials.

Health & Safety

Read product and safety data sheets before handling this product for physical and health hazard information. The safety data sheet is available from your CHT representative.
